World Net Imports:

Imports minus exports for total energy. A positive number denotes net imports, and a negative number denotes net exports.

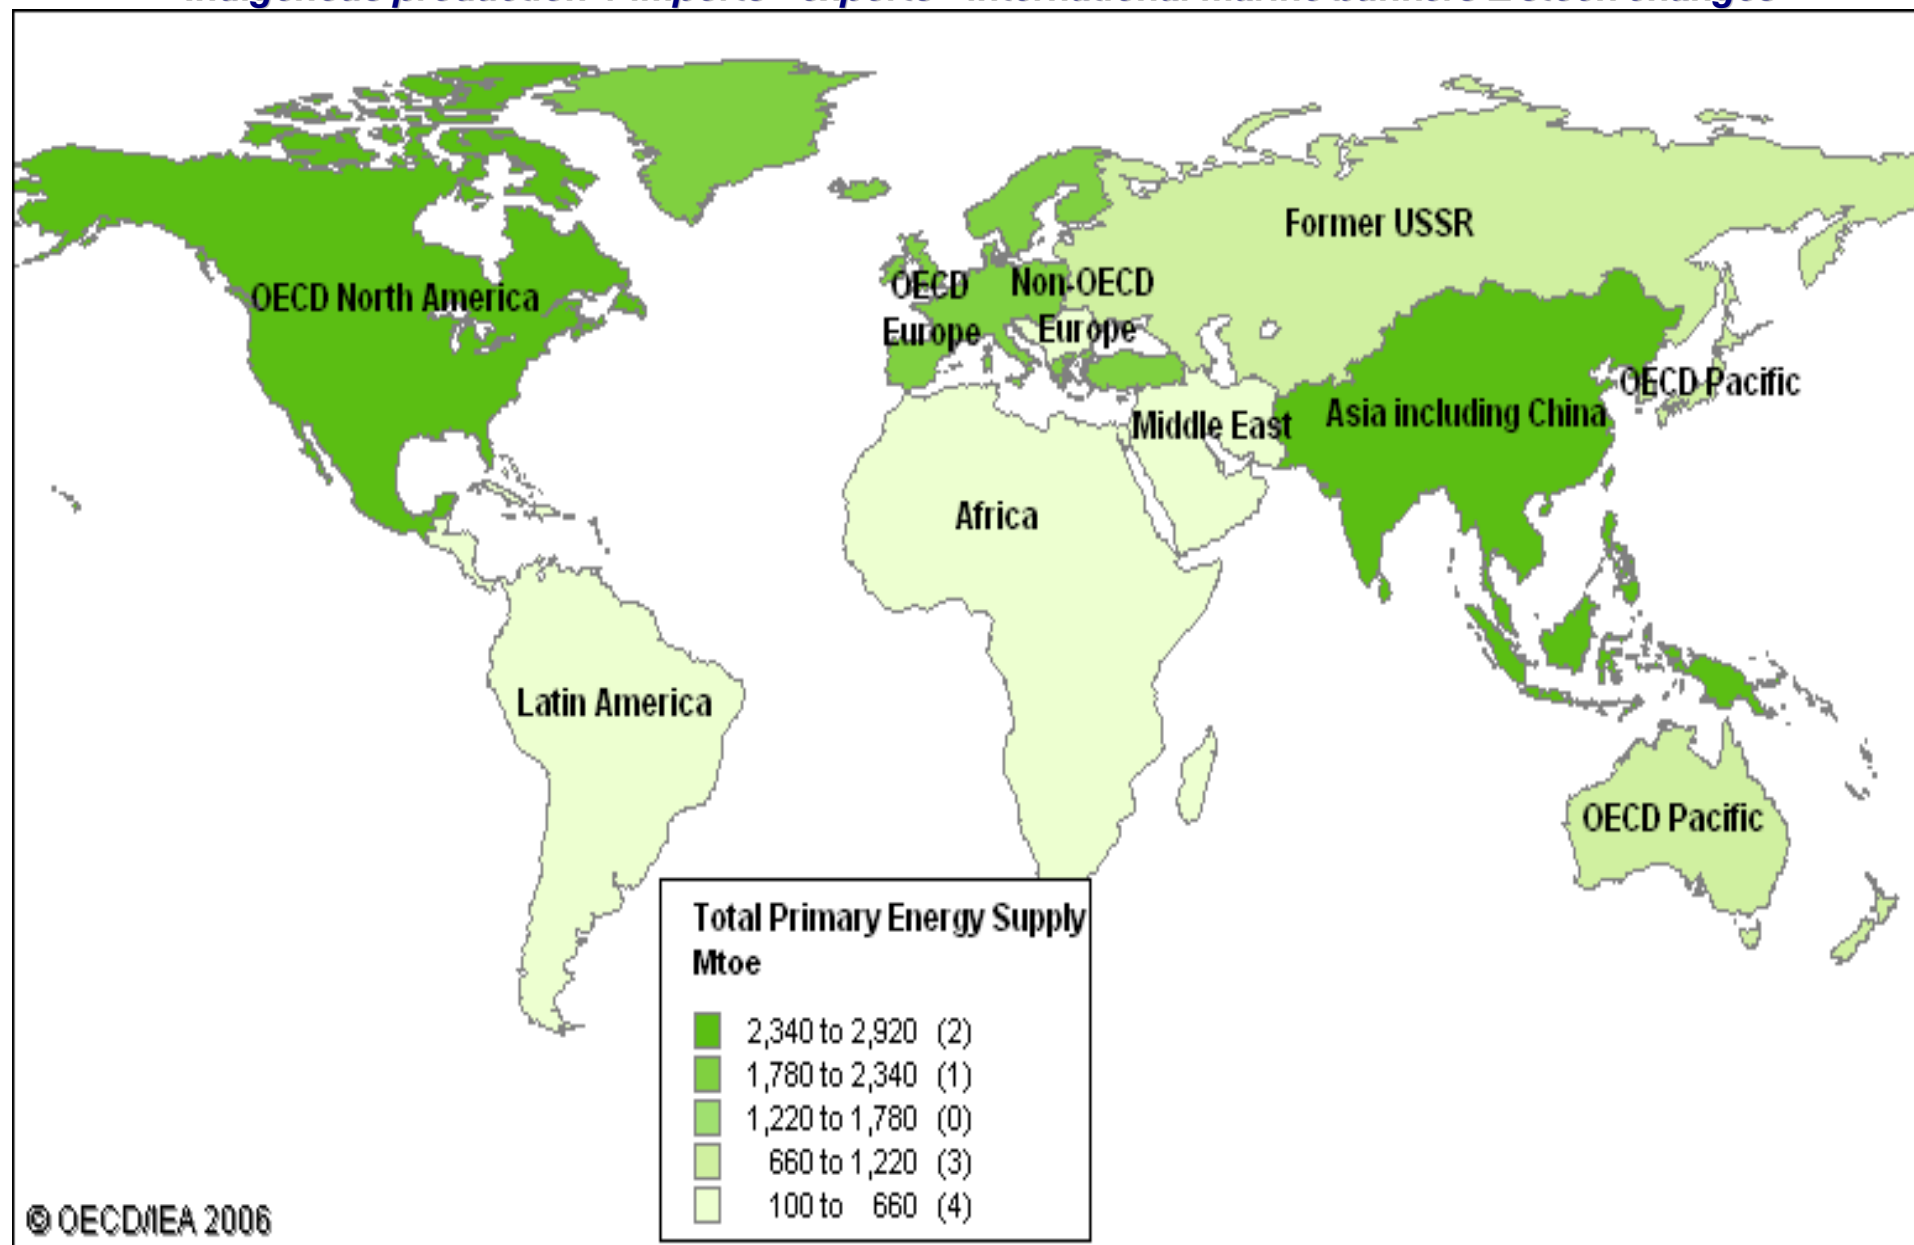

Latin American Net Imports:

Imports minus exports for total energy. A positive number denotes net imports, and a negative number denotes net exports.

Total Primary Energy Supply:

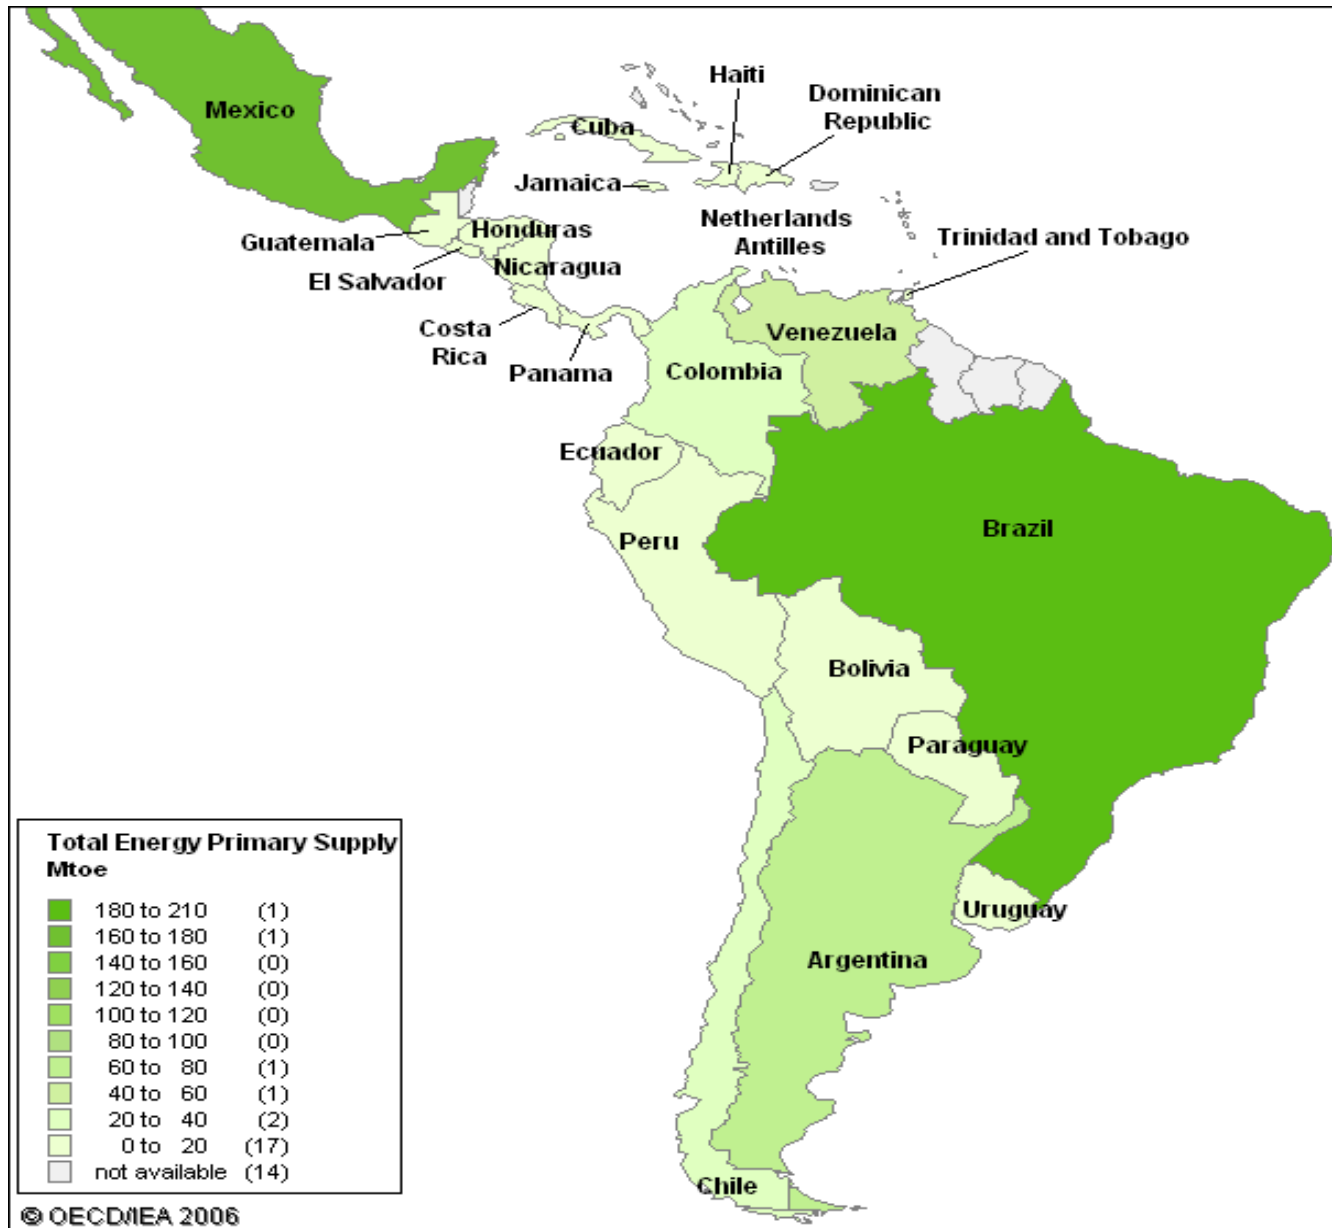

Indigenous production + imports - exports - international marine bunkers ± stock changes

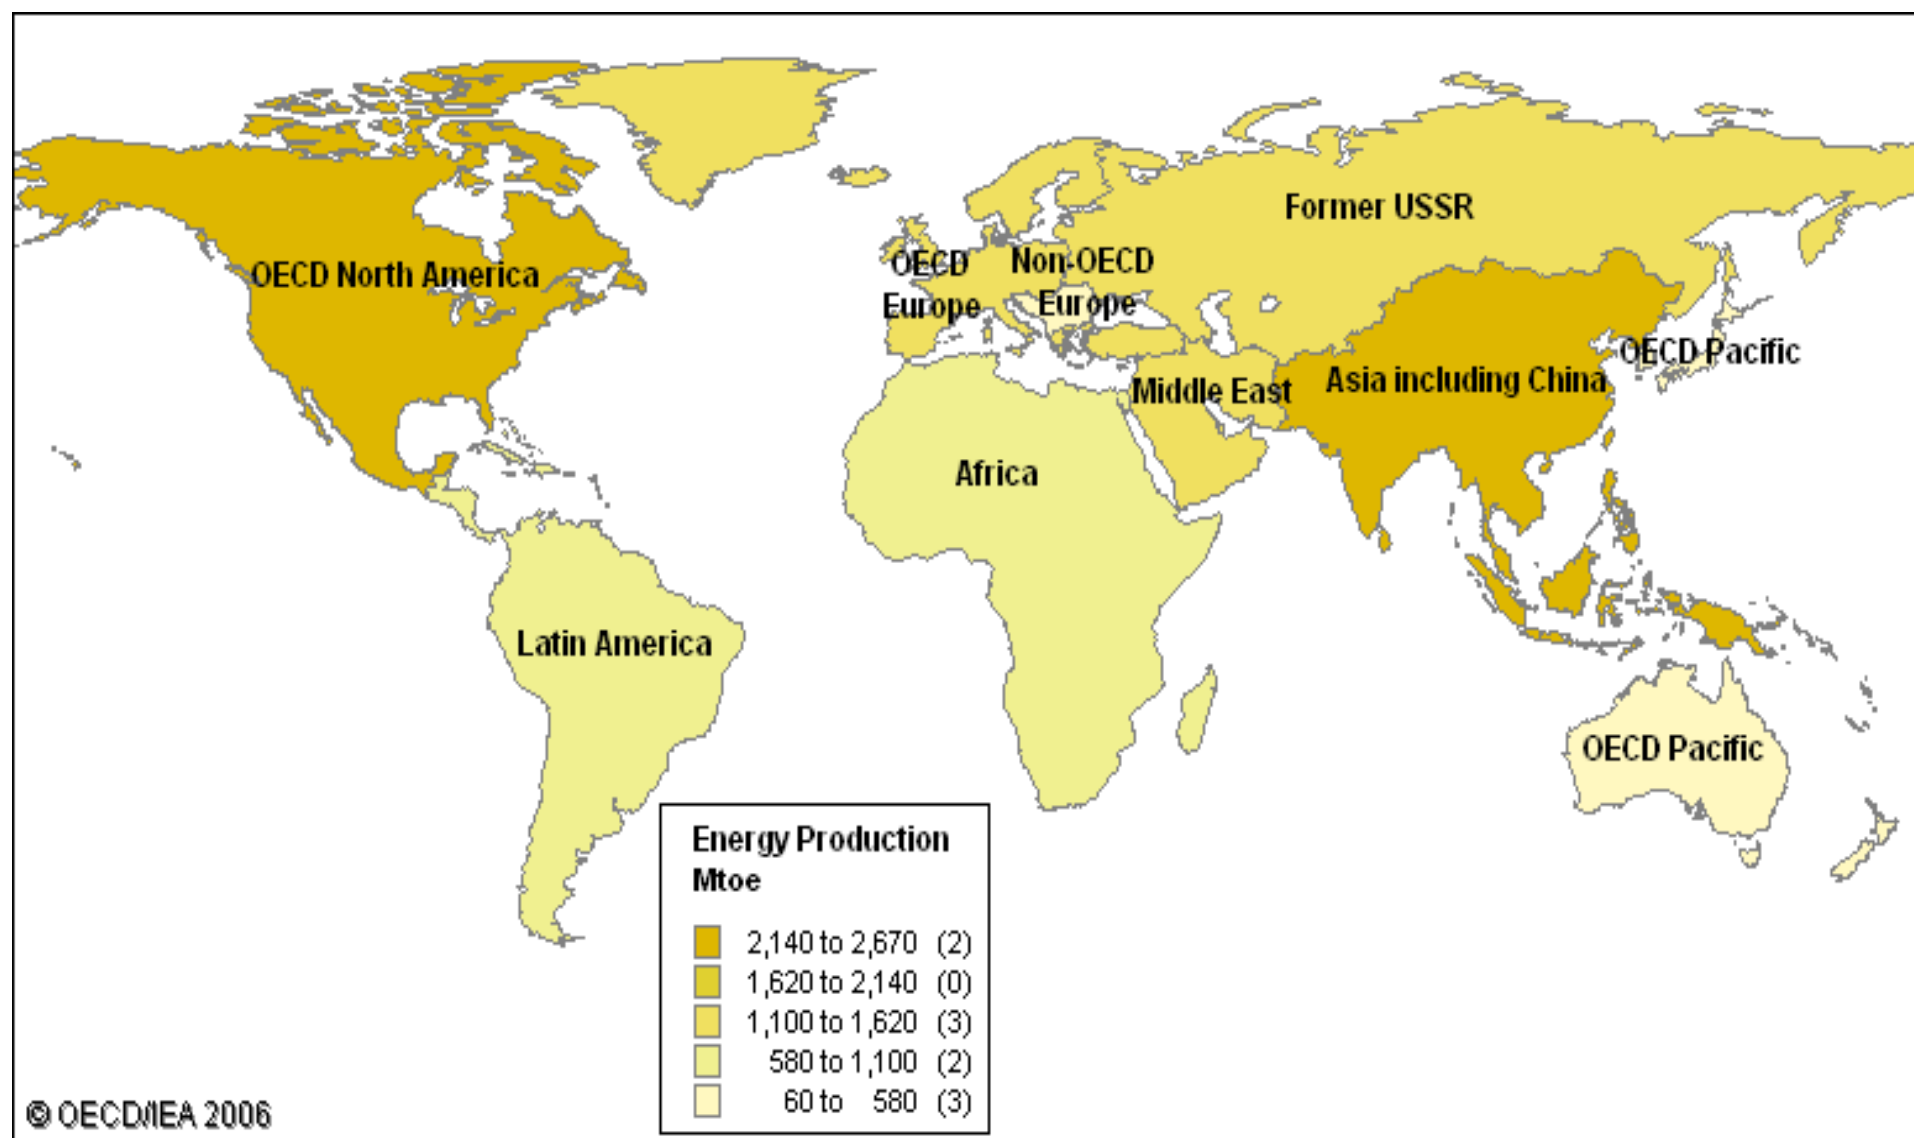

Latin America Primary Energy Supply:

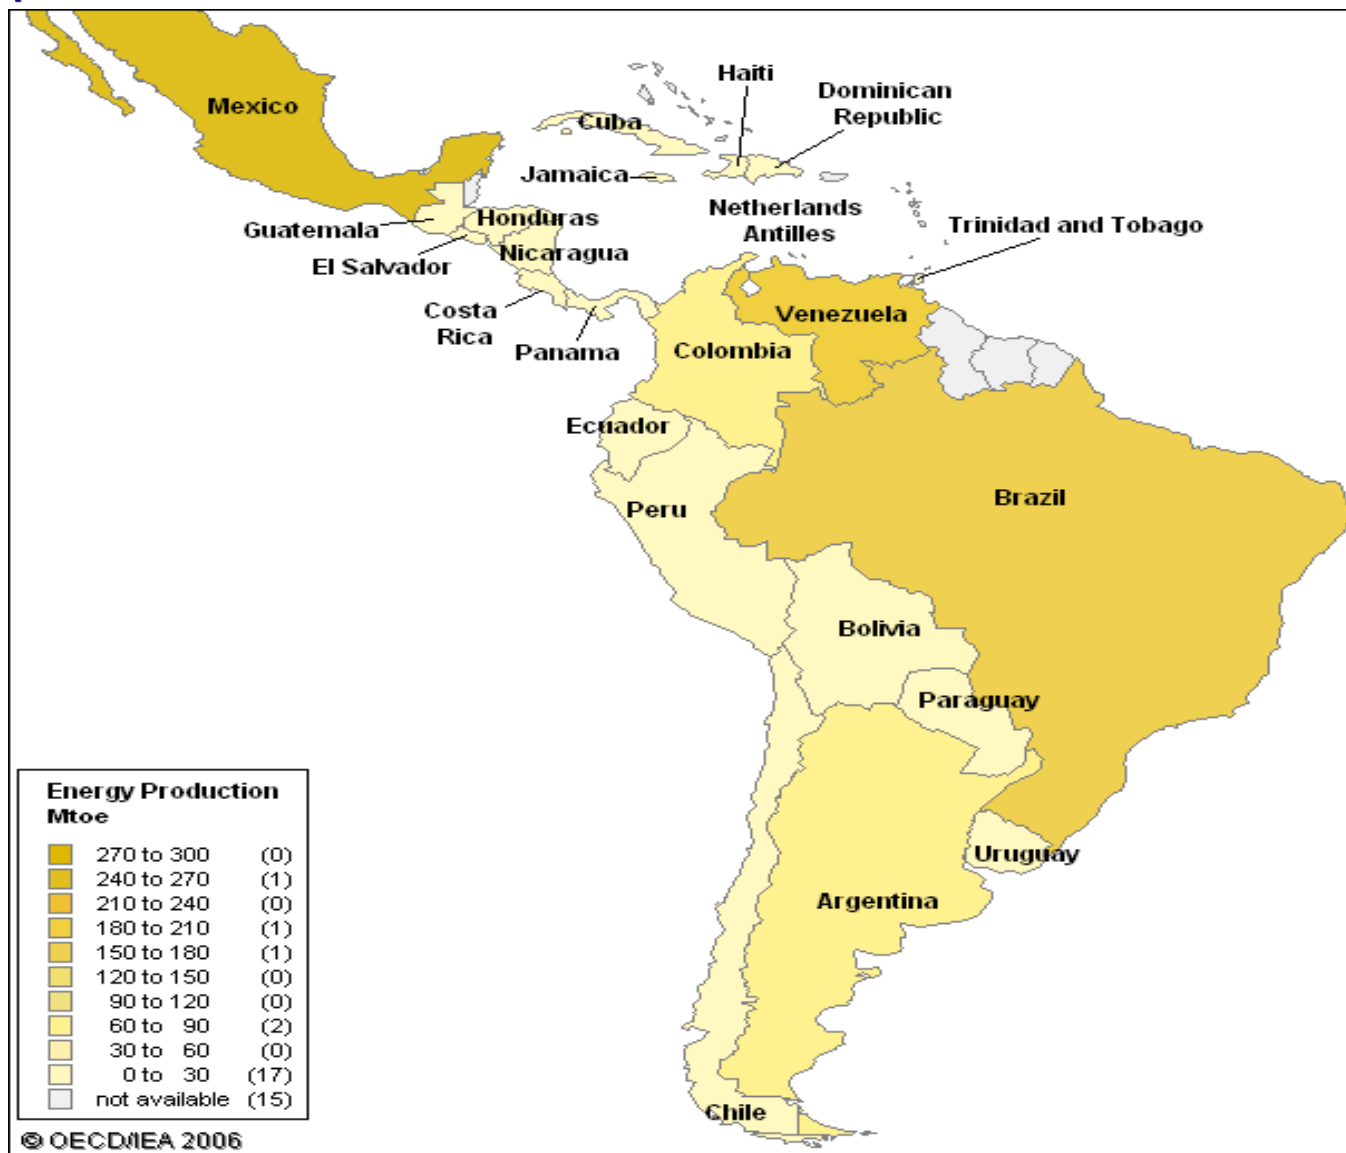

Indigenous production + imports - exports - international marine bunkers ± stock changes

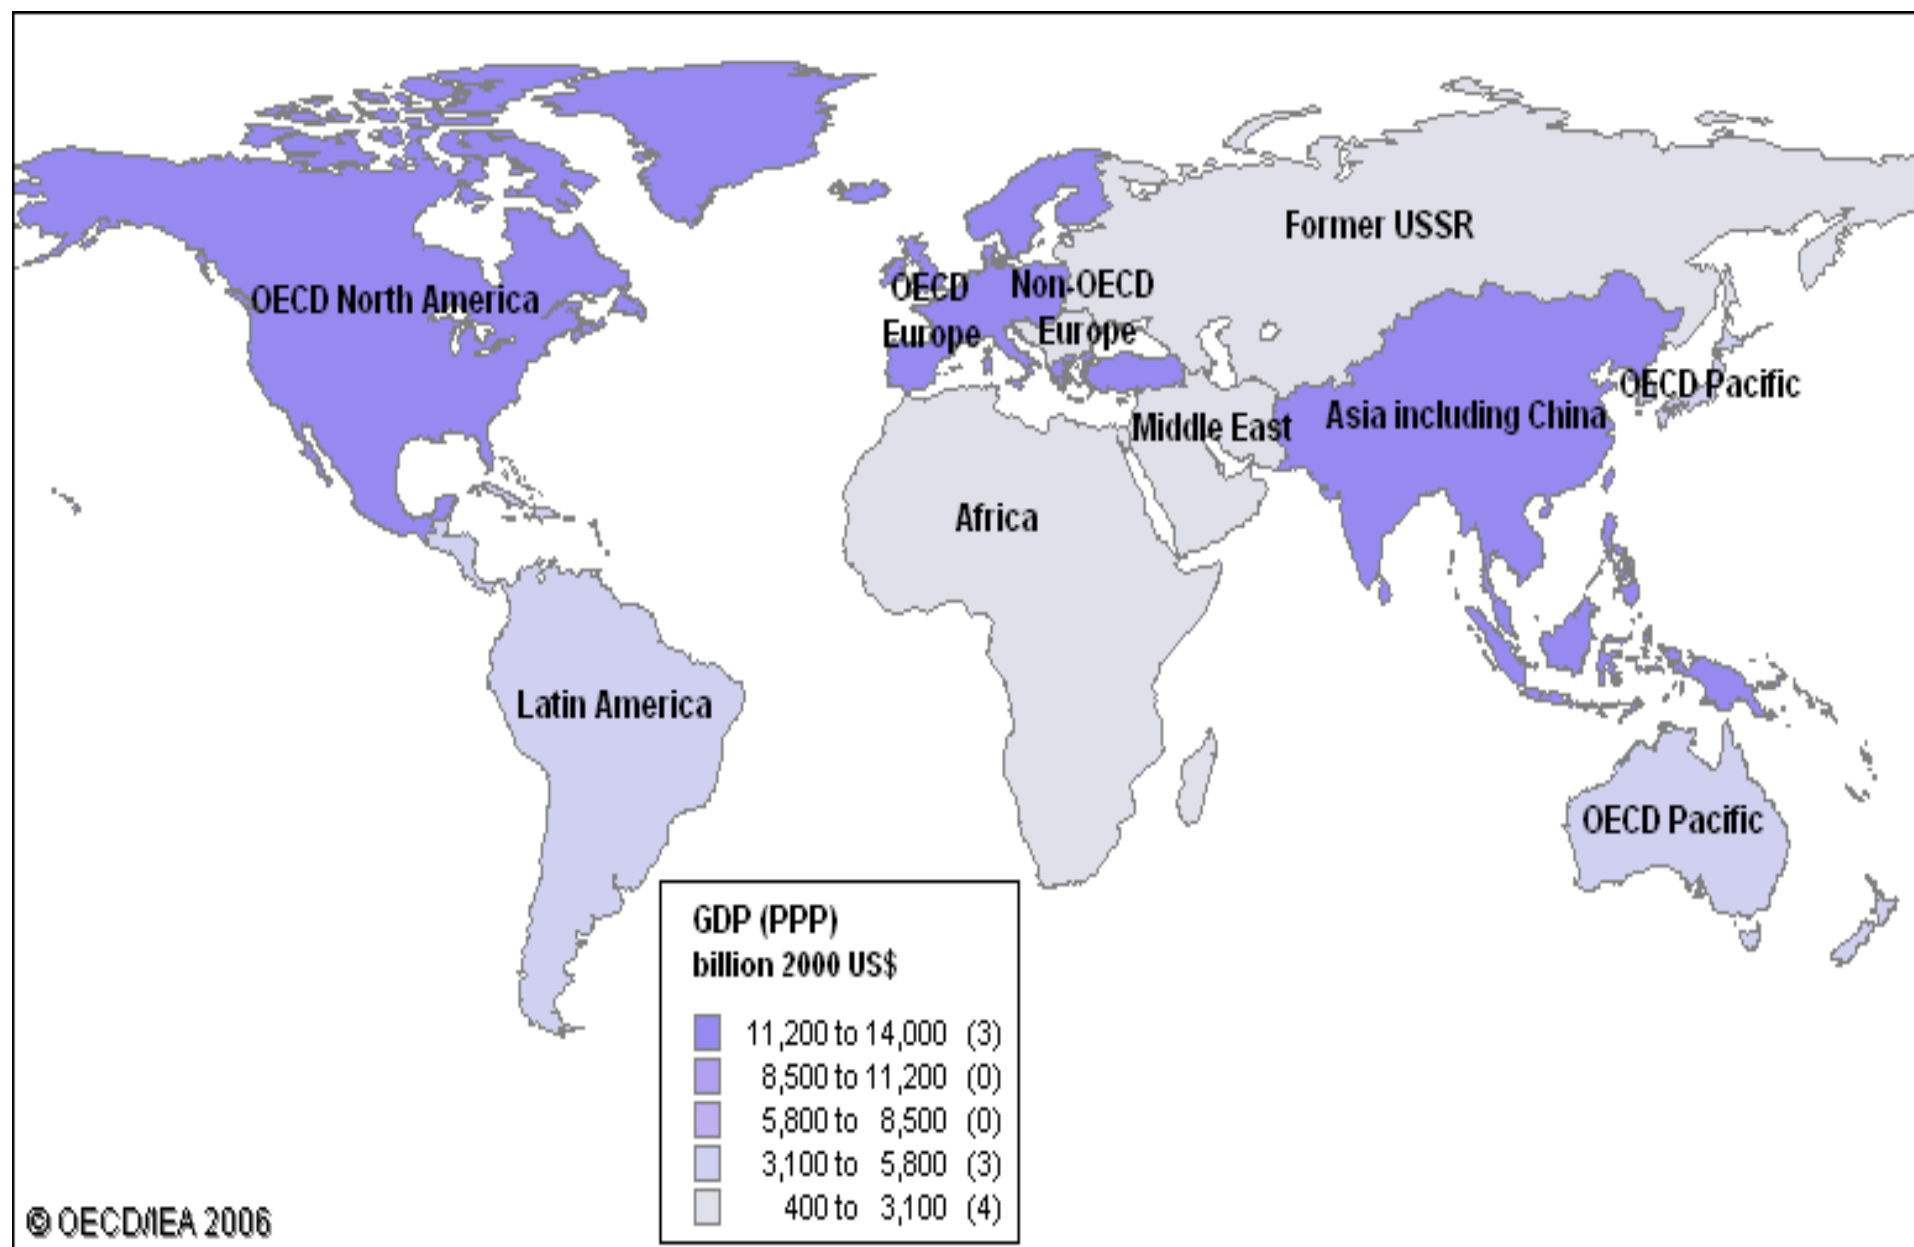

Energy Production: Total production of primary energy, i.e. hard coal, lignite, peat, crude oil, NGLs, natural gas, combustible renewables & waste, nuclear, hydro, geothermal, solar and the heat from heat pumps that is extracted from the ambient environment. Production is calculated after removal of impurities.
